

# Magnesium Sulfate

## Features of RM-25

---

Exhibits excellent solubility in water as a water-soluble magnesium fertilizer.  
It also has sufficient hardness to be used as a BB type fertilizer,  
which suppresses the creation of powder dust.

## Region of origin

---

Our products are produced consistently at our Chinese subsidiary, utilizing strict quality control.

## Characteristics

---

- Grain : 4 to 2 mm
- Water content : 3% or less
- Hardness : 2.0 kgf or greater
- Guaranteed composition (%) : W-MgO 25.0

## Delivery formats

---

- Flexible containers (with internal bags) : 1000kg
- Other delivery formats also possible
