

Smoke carbonized chaff (Soil preparation materials and steel insulation materials)

Smoke carbonized chaff

In southern Vietnam, rice husks recovered from mills are carbonized in special smoking furnaces. Since there are three crops of rice per year, a steady supply is available for shipment.

Quality

Typical component values

| | |
|-----------------------------------|-----|
| LOI (volatiles + fixed carbon) | 58% |
| SiO ₂ | 39% |

Delivery formats

[For soil]

- In 100-liter PP(polypropylene) bags
- Import: approx. 1000 bags / 40-ft sea shipment container

[For steel]

- In 2Kg, 5Kg and 10Kg bags
- Delivery in forms of blocks is also available.

product

Efficacy

[For soil] With a fine porous structure, improves aeration, drainage and water retention, as well as softening soil.

[For steel] Insulation effect

[For use as snow melting agent]

Has a snow melting effect by improving the absorption of sunlight when spread on top of snow.
